
a) Locked split & safeguards
Supplied matrices
Predefined split / folds
Development model selection
Held-out final evaluation
held-out feedback blocked
access after locking
b) Updated WrapEvoFS workflow
Development only
1 Configured preprocessing
2 Direct candidates
3 RFECV soft target
4 Target-guided GA 5 runs
5 Fixed Dev-CV rescoring
6 Jaccard medoid
7 Locked output
8 Held-out evaluation
filter · impute transform · scale
SVM-L1
XGBoost
Boruta-RF
Regret-eligible pool (R ≤ δ)
Eligible-pool Jaccard
mean J
medoid (selected)
Final held-out evaluation
no reselection / retuning
held-out data
machine-readable audit artifacts
